SUMMARY

I design and ship AI inside real products: RAG, embeddings, agents, knowledge bases, and automated support. I connect LLMs to CRMs, WhatsApp, and APIs with per-tenant context isolation, cost/latency evaluation, and guardrails. I currently work at Genesis Company as Software Engineering Director and Software Engineer.

EXPERIENCE

Jul 2025 – Present	Software Engineering Director & Software Engineer Genesis Company · Rio de Janeiro, Brazil • I led applied AI engineering for CRM and support: agents, RAG, FAQ, and routing. • I implemented RAG pipelines (chunking, embeddings, retrieval, rerank, and grounded answers). • I modeled vector stores and knowledge-base refresh policies per organization. • I designed agents with function calling, session memory, and human handoff. • I applied guardrails: prompt injection, PII, tenant isolation, and token control.
Jul 2024 – Jul 2025	Web Developer / Software Developer Webmaker · Rio de Janeiro, Brazil • I built web apps and API integrations that later fed AI-backed workflows. • I improved performance and technical SEO with React, Next.js, HTML, CSS, and JavaScript.
