SUMMARY

I define end-to-end SaaS architecture: multi-tenancy, APIs, queues, security, and horizontal scale. I turn business requirements into contracts, isolation boundaries, and cloud decisions (AWS and Azure). I lead the Software Department at Genesis Company.

EXPERIENCE

Jul 2025 – Present	Software Engineering Director & Software Engineer Genesis Company · Rio de Janeiro, Brazil • I led architecture for multi-tenant SaaS (workspaces, RBAC, data isolation). • I designed APIs, webhooks, queues, and async processing for messaging spikes (WhatsApp/Meta). • I defined scale paths: load balancing, multi-instance, rate limiting, and circuit breaking. • I modeled security: authn/authz, secrets, OWASP API, and per-tenant isolation. • I guided Docker/VPS delivery and cloud usage on AWS and Azure (compute, identity, storage).
Jul 2024 – Jul 2025	Web Developer / Software Developer Webmaker · Rio de Janeiro, Brazil • I structured frontends and integrations with performance, SEO, and API contracts in mind. • I documented flows and evolved client systems without breaking operations.

FEATURED PROJECTS

KoruVision CRM — github.com/Rafael-Rangel/koruvision-landing

Multi-tenant SaaS architecture, omnichannel, queues, and AI agents.

Pulse — pulse-rangel1.vercel.app

TypeScript app with data modeling and cloud deploy. github.com/Rafael-Rangel/pulse

EDUCATION

Analysis and Systems Development — FIAP. Completed in 2025 (2-year degree).

CERTIFICATES

- Professional Qualification in Technology Strategy and Innovation with AI and IoT (2025)
- Professional Qualification in Mobile Application Development (2025)
- Professional Qualification in Web 2.0 Analysis and Design (2024)
- Professional Qualification in Systems Analysis and Web Prototyping (2024)
- Professional Qualification in Systems Analysis and Web Prototype Design (2024)
- Professional Qualification in Web 2.0 Development and Design (2024)

TECHNICAL SKILLS

- **Architecture:** multi-tenancy, event-driven, queues, webhooks, modularization, observability
- **Scale & security:** load balancing, horizontal scaling, RBAC, OWASP, secrets, PII, rate limiting
- **Cloud:** AWS, Azure, Docker, VPS, basic CI/CD, PostgreSQL
- **Stack:** TypeScript, Node.js, NestJS, React, Next.js, REST APIs
